Response to Amendment

1. Added claims 109 - 148 and amended claims 95 and 96 are entered as requested, dated July 05, 2000.

Reasons for Allowance

2. Claims 1-148 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The present invention relates to forming a reduced pin media independent interface. The unique method steps including forming encoding and decoding a transmit control signal comprising "a transmit enable signal in one half of a cycle of the clock signal and a transmit error signal in the other half (claims 1, 20, 28, 47, 55, 69, 82, 95, 96, 114, 119, 129, 134, 139 and 140), also, forming encoding and decoding a receive control signal comprising in one half of a cycle of the clock signal a receive data valid signal or a carrier sense signal, and in other half of the cycle of the clock signal, a receive error signal" (claims 6, 15, 33, 42, 60, 74, 87, 109 and 124).

The closest prior art, Runaldue et al. (US 6,108,726) and RMII Specification Rev. 1.2 (pp 1-14) are in the same field of endeavor but fail to disclose the above underlined unique method steps and render the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
